

HERMAN, Jacques Albert Laurent-Arthur

Born at Gent (Eastern Flanders, Belgium) on 15.11.1948.

Geologist and palaeontologist (1971 to 2000) of the Belgian Geological Survey.
Palaeontologist of the Belgian Royal Institute of Natural Sciences (2000 to 2007).
Presently retired.

Formation

Free University of Brussels (1966 to 1974)

1971: Master in Geology and Mineralogy.
1974: PhD in Geology and Mineralogy (option Palaeontology).

Professional Activities

The Belgian Geological Survey was a Survey of the Mine Administration (Ministry of Economic Affairs) working in tight collaboration with the Ministry of the Public Works. This implied that the geologists had to suggest the choice for the implantation of the preliminary borings for diverse works of national interest, such as the construction of barrages, enlargement of ancient channels, the designation of the ideal zones for the extension of diverse extraction pits, research of new water levels ...

Parallel research Activities

Study of the fossil Elasmobranchii: their systematics, evolution, stratigraphical and palaeoecological implications.

Odontology of all the subgeneric taxa of extant Elasmobranchii.

Sedimentological, mineralogical, taphonomical and palaeoecological studies of the marine sediments of the Belgian Mesozoic and Cenozoic levels

Publications
